"America's Azalea - Camellia Center"

I. CORNUTA ROTUNDA

Southern Alabama's destiny — to become the nation's richest horticultural area — has been prophesied by many. An almost perfect climate, rich soil, and plenteous rainfall are contributing factors to the prophecy. They are also the explanation for the abundant growth our plants have experienced this season. The products, especially containers, offered in the following pages are in the peak of condition, and it is our privilege to offer them to you.
